Date: 02/09/2012 04:09 PM

Jay,

In response to Greg's e-mail request for information.

For 2013MY, we will be certifying two diesel engine dynamometer certified families.

DFMXH06.7A24 - <14K GVWR
DFMXH06.7B23 - >14K GVWR

There will be new test data for these families.

We are targeting application submittal to you by **CBI/Ex. 4** and EPA Certificate required by date of **CBI/Ex. 4**.

Please let me know if there are any questions on this or if you require additional information.

Best Regards,

Travis Henney (THENNEY)

Dear Certification Contact,

As part of our planning process for potential confirmatory testing of on-highway, heavy duty engine families, we are contacting manufacturers to determine certification plans for the 2013 model year. Particularly, we are interested in which families will be certified for the first time versus those which will be carried over. For any new families, it would be helpful if you could provide the expected date of your certification testing. Also, provide the date by which you anticipate needing certificates for all families.

Please contact myself or your EPA certification representative if you have any questions. Your assistance in this matter is appreciated.

Sincerely,

Greg Orehowsky
